LAB EXERCISE 1
TOPIC 1: PROGRAMMING PROBLEM SOLVING

NAME: Edwin Ob Ming Hen
MATRIC NO: A24CS0248
SECTION: 5

QUESTION 1 [5 Marks]

Based on the following pseudocode in **Figure 1**, complete the trace table given in **Table 1**.

```
1. START
2. READ n, m
3. IF (n > = m)
   3.1 START_IF
      3.1.1   IF (n > 10)
         3.1.1.1 START_IF
            3.1.1.1.1   IF (m> 10)
               3.1.1.1.1.1 START_IF
                  3.1.1.1.1.1.1   PRINT "both n and m is greater than 10"
               3.1.1.1.1.2 END_IF
            3.1.1.1.2   IF (n = = m)
               3.1.1.1.2.1 START_IF
                     3.1.1.1.2.1.1.1 PRINT "n is equal to m"
               3.1.1.1.2.2 END_IF
         3.1.1.2 END_IF
   3.2 END_IF
4. ELSE
   4.1 PRINT (n-m)*2
5. PRINT n, m
6. END
```

Figure 1

ANSWER:

Table 1

n	m	Output
0	0	0 0
10	0	10 0
20	10	20 10
20	20	both n and m is greater than 10 n is equal to m 20 20
0	10	-20 0 10

QUESTION 2 **[20 Marks]**

Write a pseudo code for a program that will implement the following decision table in **Table 2**. The program will print the input grade point and the class of degree based on a user input. The program will terminate the loop when a user input a sentinel value other than 'y' or 'Y'.

Table 2

GRADE POINT	Class of Degree
0.0 – 0.99	Failed
1.0 – 2.00	General degree
2.1 – 2.7	Second class lower
2.71 – 3.69	Second class upper
3.7 – 4.00	First Class

ANSWER:

1. Start
2. Do
3. Read n
4. print n

5. If (n>=0 && n<=0.99)
5.1 Print "Failed"
6 else if (n>=1 && n<=2)
6.1 Print "General degree"
7 else if (n>=2.1 && n<=2.7)
7.1 Print "Second class lower"
8 else if (n>=2.71 && n<=3.69)
8.1 Print "Second class upper"
9 else if (n>=3.7 && n<=4)
9.1 Print "First class"
10 End if
11 else
11.1 Print "error"
12 Read sentinel
13 While (sentinel=="y")||(sentinel=="Y")
13.1 End while
14 End
